## CAH Pulse | NEW EPISODE!

### Season 2 | Episode 3: Ryan

#### *The Son of a Rainbow Maker*

In this memorable episode, Ryan, who has seemed to manage his classic salt wasting CAH head-on with an organized, matter of fact approach, has been faced with new challenges to consider now that he is in his 30's. Ryan's mom, Heidi, knew in his first 2 weeks of life that something was just not right with her baby and thanks to her intuition and diligence she did not stop until the hospital found a diagnosis. Once she was told her newborn had CAH, she began her quest to give Ryan the very best life she could, filled with independence, knowledge, responsibility and most of all positivity. Ryan credits his mom for being his rock, leading him to live a typical life filled with adventure, fun and love.

Join Stephanie and Dina as they visit with Ryan and unveil how he has navigated living with CAH from elementary school, through college and recently marriage as well as his difficult relationship with the powerful steroid "Dex" and how grateful he is for every one in his life who has helped him on his journey with this rare condition.

## **A Gift That Keeps on Giving**

CARES Foundation's Endowment is designed to provide a stable, permanent source of funding. Your contribution will be carefully invested, with the annual returns supporting our mission in perpetuity. This means your single act of generosity will touch lives year after year, creating a ripple effect of positive change.

## **Every Gift Matters**

Whether large or small, your contribution to the endowment fund is an investment in hope. It's a promise to future generations that they will have the resources, support, and opportunities they need to thrive despite CAH.

## **How an Endowment Grows...**

An establishing gift is made and forms the principal

The principal is protected, invested, and continues to grow

A portion of the fund's value is distributed annually, forever

## **Our Mission**

CARES programs benefit more than 3,600 families and medical professionals across the United States and abroad. Our community represents every state in the United States and over 70 countries outside the US. These programs include:

- Grants to qualifying researchers for better treatment, better understanding of the disease, and a cure
- One-on-one support for affected individuals and their families
- Educational materials and information for those living with the daily challenges of CAH
- Educational programs for individuals, and their families and health care professionals
- Comprehensive bi-annual newsletters
- Physician referral service
- Advocate for comprehensive newborn screening
- Advocate for appropriate emergency medical care
- Support groups for affected individuals and their families

**OUR ENDOWMENT ENSURES THAT THIS VITAL WORK CONTINUES FOR GENERATIONS TO COME**

# Be a hero for the CAH community!

Help improve treatment and care for fellow CAH patients by participating in the CAHtalog™ Registry. CAHtalog is a comprehensive collection of clinical data from medical records from patients living with classic congenital adrenal hyperplasia (CAH), designed to drive advancements in CAH research.

CAHtalog is open to adults and caregivers on behalf of their children living with classic CAH and who receive medical care in the United States.

Sign up on CAHtalog.com in less than 10 minutes. Here's what you can expect:

### After signing up, sit back and relax

Nothing else is required. PicnicHealth will collect your medical records on your behalf.

### We take your privacy seriously

All personal identifying information will be removed from your medical records

Receive comprehensive access to your medical history as a benefit of participating in CAHtalog™:

-  PicnicHealth will organize your records from multiple providers so you can easily track your lab values, medications, images, and doctor's notes—all from your electronic device.
-  Share your medical history with anyone you trust, anywhere, anytime.
-  You can be compensated for your time to complete optional short surveys twice a year.

## USE

ALKINDI SPRINKLE is a prescription medicine used in children from birth to less than 17 years old as replacement therapy when the adrenal gland is not making enough cortisol.

## IMPORTANT SAFETY INFORMATION

**Always give ALKINDI SPRINKLE exactly as your doctor has directed.**

**Do not take ALKINDI SPRINKLE if you are allergic to hydrocortisone or any of its other ingredients.**

**Adrenal Crisis:** giving too low a dose or stopping medication can cause low levels of cortisol, which can result in serious illness or death. Treatment with intravenous hydrocortisone should be started immediately. When switching from another type of hydrocortisone to ALKINDI SPRINKLE, watch your child closely for any changes. If your child doesn't get the entire dose of ALKINDI SPRINKLE because of vomiting or spitting some granules out, contact your doctor to see if another dose is needed.

**Immunosuppression and Increased Risk of Infection with Use of a Dosage Greater Than Replacement:** Use of a greater than replacement dosage can suppress the immune system and increase the risks of new infections or exacerbation of latent infections with any pathogen, including viral, bacterial, fungal, protozoan, or helminthic infections. Monitor patients for signs and symptoms of infections.

**Growth Retardation:** the long-term use of corticosteroids in high doses may cause growth retardation in children.

**Decrease in Bone Density:** corticosteroids can affect your child's bone growth and strength.

**Cushing's Syndrome Due to High Doses of Corticosteroids:** treatment with high doses of corticosteroids can cause Cushing's Syndrome. Treatment should be limited to the smallest dose required, and your child's growth and development monitored appropriately.

**Changes in Vision:** tell your doctor if your child has blurred vision or other vision problems during treatment with ALKINDI SPRINKLE.

**Psychiatric Changes:** corticosteroids can change your child's behavior or mood. Tell your doctor if your child has periods of extreme happiness, extreme sadness, hallucinations, or depression.

**Gastrointestinal Reactions:** tell the doctor if your child has stomach pain, upset stomach, black, tarry stools, or vomiting of blood. These could be signs of ulcers or tears in the stomach or intestines. Taking anti-inflammatory nonsteroidal drugs, like ibuprofen, naproxen, or aspirin, can increase the risk of ulcers or tears.

The most common side effects of ALKINDI SPRINKLE include retaining fluids, changes in glucose tolerance, high blood pressure, behavioral and mood changes, greater appetite, and weight gain.

**Vaccination:** Administration of live vaccines may be acceptable in ALKINDI SPRINKLE-treated pediatric patients with adrenocortical insufficiency who receive replacement corticosteroids.

Please visit [ALKINDISPRINKLE.com/patient](https://www.alkindisprinkle.com/patient) for more information

You are encouraged to report negative side effects of prescription drugs by contacting Eton Pharmaceuticals, Inc. at 1-855-224-0233 or the U.S. Food and Drug Administration (FDA) at [www.fda.gov/safety/medwatch](https://www.fda.gov/safety/medwatch) or call 1-800-FDA-1088.

## Share Your Experiences With CAH and Help Others

Pinpoint Patient Recruiting, a market research recruitment company, is looking for adults (ages 18+) who have been diagnosed with congenital adrenal hyperplasia (CAH), and caregivers of children living with CAH, to participate in online market research surveys and interviews. These opportunities will be conducted throughout the year to help researchers better understand the experiences and opinions of people living with CAH and caregivers of children living with CAH.

Those who qualify for and participate in a study will receive \$50 or more as a thank you for their time. All information and responses will remain confidential. The research opportunities are sponsored by pharmaceutical companies. No medication will be given or tested.

# 2024 CAH EDUCATIONAL CONFERENCE

## The CAH Community CARES About Connectivity

At the 2024 CAH Educational Conference presented by CARES Foundation, Crinetics Pharmaceuticals developed and disseminated a survey completed by patients and caregivers. Participants were asked, "What is your favorite part of the CARES Conference?"

While the responses below provide different perspectives, connectivity was the central theme. Making connections at CARES helps the CAH community feel seen, heard, and understood...and keeps them coming back year after year.

### What is your favorite part of the CARES conference?

**SAVE THE DATE: September 20 & 21, 2025**

## **2025 ANNUAL CAH EDUCATION CONFERENCE**

### **Testimonials from last year's conference in New Jersey:**

"Great talks. We loved the new perspective and new context on exercise & diet. This was all very helpful!"

"Amazing! I wish I had those diagrams/videos when we were going through my daughter's surgery. I better understand what her surgery looked like."

"Very relevant information for my current stage in life. Top of mind and looking for this info. Very detailed and easy to follow."

"We heard many great presentations where presenters tried to break down a very confusing topic and had made it easier to understand."

"Loved hearing about things we need to think of in the future!"

"Incredibly knowledgeable and helpful. Presenters even stuck around to answer my questions. We learned a ton!"
